# Welcome Home

Officially deemed a village in 1909 Biggar has stayed a vibrant relevant community growing into a town of more than 2100 people by 2025. While still relying on our roots of railway and agriculture Biggar has become home to more than 200 businesses; three of which are known nation wide.

In 2022 Biggar revitalized it's downtown core, giving it a fresh new 1920's look. Currently the community is also working on refreshing our entrance to town and the far south end of Main Street. This rejuvenation has brought new businesses, new visitors, and new residents to our beautiful and growing community.

Biggar doesn't just look the part of a hallmark town, we are just that! Residents here enjoy regular drama and music productions, the latest movies, high school and minor sports, and community events such as Fair days, Santa Claus Parades, rodeos, Fowl Suppers, and so much more!

Community spirit is alive and well in Biggar, Saskatchewan. Whether it is banding together to see Revitalization through, bringing Farm in the Dell to our community permanently, or rallying for an improved daycare space. The residents in this community are just as close and hold just as much of that small town charm as we did back in 1909.

The Town of Biggar is a great place to live and operate a business. The clean, beautiful downtown core along with the World-Famous logo and signs showcasing our residents World Championships invite highway traffic in to see what all the fuss is about while visiting our local stores. Biggar is the cross over point for two main highways as well as one secondary highway which increases the chance for more traffic stopping in on their way to their destination. When the three highways are paired with two main railways running through the community, Biggar quickly becomes one of few communities where logistics management is an ease not an issue. Population wise, the number increases to around double when the local farmers and other small communities in the trading area are considered. The amenities available for residents such as schools, hospital, day care, local shopping, affordable housing, recreation facilities, service clubs and organizations along with the close proximity to Saskatoon make it the perfect place to work, live and raise a family. The Town of Biggar is also very supportive, with their staff and council always coming up with new and innovative ways to help connect its residents and business community, finding new opportunities to help them stay successful through events and incentives focusing on growth. Even though the above are all valid reasons why living in and owning a business in Biggar makes sense, as a long time resident who has worked and raised a family here, I believe the sense of community and togetherness are the main drawing points. This community is very welcoming and supportive. It is a place where businesses and community members alike work together to help each other succeed. I invite you to come join us and find out why Biggar is Better!

### Farm in the Dell is coming to Biggar!

Our community has come together in partnership with the RM of Biggar, service providers, local contractors, businesses and individual donors to raise and commit the funds and resources necessary to establish and support this project. The Town of Biggar's commitment of approximately 96 acres of land on our outskirts will provide both the unique rural living atmosphere as well as the amenities of our town's many services and supports to the future residents of the new facility, as well as those accessing vocational day programs. With the commitment of land, services and financial contributions to this project, it truly is a community endeavour that has captured the philanthropic spirit of everyone who has made themselves familiar with the unique Farm in the Dell concept. Another Saskatchewan success story that the Town of Biggar is proud to be part of.

Their flight crews, air medical crews, and communications specialists work in concert to ensure that patients receive the best care available in the shortest period of time possible.
